About Renée Laprise

Born and raised in Southern Ontario, Renée has a BFA from the University of Toronto and currently lives and creates in Prince Edward Island, Canada.

After years of practicing to find her voice as an artist, Renée has developed a painting style that is uniquely hers.

The stories told in each piece are inspired by Renée's past and present day experiences intermingled with imagery from Mother Nature and symbolism whispered from the cosmos..

Underlying all of her work is an intense interest in mystical interconnection of the physical and non-physical realms.

‘Vision Quest’

This narrative painting travels from past to present to future and bridges the physical and non-physical realms.

The butterflies represent transformation and the owl represents a divine message.

The cracked Earth represents a depletion in the spirit but the ancestresses' blood and the water from the star-people are replenishing the body and the land.

Accepting this gift allows for the revivification of the land and the younger self is finally given the nourishment she needs.
